***I.      DEAN UPDATE-*** See Attachment 1

Named Professorships have been awarded to Profs. Niu, Qin, M. Rahman, and Y. Wang. Profs. Amano D'Souza, Sobolev, and L. Wang were awarded named faculty fellowships.

Interviews are underway for faculty positions. Please attend seminars and department meetings as appropriate.

There will be an internal search for the Associate Dean position. Please consider applying or encouraging others to do so. The process will likely continue into the summer.

Renovations are progressing in the EMS building. There will also be periodic disruptions with the new Chemistry building construction.

Provost Britz is moving to a Senior VP role in the UW System. It is important for CEAS to continue to generate more research activity and tuition revenue to best position ourselves with the future Provost.

Some upcoming events include the Student Poster Competition (April 30), the Order of the Engineer ceremony (May 21), and Commencement (May 22).

***II.      ANNOUNCEMENTS***

**A.** Associate Dean Graettinger provided several updates:

UWM is working to maintain Carnegie R1 status. The next data collection period is July 2022-June 2023. CEAS contributes primarily to the R1 effort through research expenditures, post docs and scientists employed, and doctorates awarded.

CEAS is developing a Collaborative Post Doc Program, offering assistance to encourage students rushing to a May graduation to defer until August, and is working on developing a program to support creating teams of 3 faculty from 2 departments to write 1 proposal.

There are two open positions in the CEAS Office of Research. As a result, there is a need for allowing more time for proposals to be processed.

B. Professor Christine Cheng provided updates on the DEI taskforce.

The DEI steering committee has been set, and department representatives been identified.

The taskforce has been considering data on underrepresented students to study diversity and equity. The current data can be used as a baseline and compared with national and regional data. This will shape goals for recruitment and retention.

Student listening sessions begin this afternoon. These will be moderated by Chris Beimborn, be online, and focus on identifying drivers and barriers to academic success and exploring influences on participants' sense of belonging.

A DEI Climate Survey was sent to all students yesterday. Topics for questions include peer-to-peer interactions, faculty-student interactions, advisor-student interactions, and factors and barriers that influence academic success. The taskforce is hoping to get at least 200 responses.

Next steps include processing the data and creating a report to be shared with faculty and staff. This will then translate into CEAS initiatives for 2022-23.
