Community Collaborations and Service

Groundwork Milwaukee (nonprofit environmental organization): Research collaboration, created free customized open-source GIS based Community Information Systems for Groundwork Milwaukee, to help in spatial planning, data analyses. This CIS helped the organization to strategically plan its activities in water management and urban gardening.

Milwaukee Urban Garden: Participated in Milwaukee Water Policy Committee, led by Bruce Wiggins (MUG). Provided free research that examined (i) policy barriers to urban agriculture in Milwaukee (ii) water policy and zoning requirements in three mid-western cities (iii) Cross comparisons between Milwaukee and other cities. This research helped MUG and other partners to contest Milwaukee's policy barriers, creating new urban agriculture zoning regulations. Led to forming new urban agriculture zoning law to facilitate community gardening practices.

Neighborhood House: Free spatial analysis and mapping to advance organizational goals of advancing urban agriculture and environmental restoration.

Urban Ecology Center: Assisted with citizen science projects related to habitat restoration, environmental sustainability.

Harambee Ombudsman Project Inc (CBO): Research collaboration, created free customized Internet GIS based Community Information Systems for Harambee community organization. The CIS provided spatial analysis and visualization, which advanced organizational participation in neighborhood revitalization planning programs hosted by the City Hall, CBGA.

Metcalf Park: customized GIS based Community Information Systems for Metcalfe Park Residents Association, Milwaukee. The ensuing spatial analysis and mapping advanced organizational participation in neighborhood revitalization programs to obtain actions.

Data Center at Nonprofit Center of Milwaukee: Decade long collaboration in GIS analysis and mapping that served 24 inner city community organizations in Milwaukee
